

OASIS 2.0 Release Notes (9/8/2005)

Changes in this release include:

- Improved name searching
- Greater control of search precision (search on whole words only or add a wildcard (*) to search for spelling variations; e.g., searching **richard*** retrieves richard, richards, richardson, etc.).
- Refine a search by searching within a results set.
- Faster browsing of long finding aid lists.
- Browse all OASIS finding aids, regardless of repository.
- Options to download and print finding aids in PDF format.
- Interface and functionality similar to other Harvard catalogs, such as VIA.
