

New DRS Release Notes for Version 2.12 (Nov. 2016)

This document describes enhancements and bug fixes contained in this release.

Key Enhancements and Bug Fixes

- FITS: Many bug fixes and enhancements to the File Information Tool Set (tool set used by DRS to identify, validate, and extract technical metadata for various file formats).
- Improve Page Delivery Service performance by redesigning how new DRS supplies metadata to PDS and Mirador.
- Technical work in support of streaming video.
- Deposit/Batch Builder (v.2.2.4, released 21 Oct 2016):
 - Switch format extension checking for all content models from FITS (File Information Tool Set) to OTS (Object Tool Set).
 - Support for deposit of user-supplied PDF/A derived from a word processing file within a Document object.
 - See the LTS user doc wiki for the 2.2.4 download package:
<https://wiki.harvard.edu/confluence/x/sgCfC>
- Technical debt: upgraded server software (Java, JBoss, Tomcat) to latest version.

Please contact LTS Support Center with any questions: <http://nrs.harvard.edu/urn-3:hul.ois:drshelp> .
