

New DRS Release Notes for Version 2.8 (Nov. 2015)

This document describes new features, bug fixes and known issues in the latest release.

Key New Features

- Initial support for migration of large PDS Document objects
- Automatic deactivation of delivery URNs on object and file deletion
- Other bug fixes and enhancements

Enhancements and Bug Fixes in Detail

Web Admin:

- Delivery URNs are now automatically deactivated in NRS when files or objects are deleted
- Object deletion event is now associated with object during bulk deletion
- Files and objects now download with original names when this download option is selected
- Objects and files that are sensitive data now indicate status “sensitive”
- All file delivery URNs are displayed at the top of the file summary page
- Objects and files summary pages now display delivery URN type

DRS Services:

- “DASH” and “URI” values can be now used as Harvard metadata links identifier types
