Sources of Content

HOLLIS+ is the library's discovery platform. Questions about activated sources and their depth of coverage may be submitted via the feedback form. Together we will make research easier for our users.

- Finding Aids
- Geospatial data
- Images
- PCI collection: HathiTrust
- Syndetics Tables of Contents

Alternate coverage

You will notice that content of databases which do NOT appear on Active Sources list often DO appear in search results. Alternate sources of metadata are often available for our purchased content.

Example: A ProQuest database may not be available for searching in HOLLIS+, but most of the article citations have been harvested directly from journal publishers.
