

January 16th Wiki Release

On January 16th, the iCommons team will release an update to the Harvard Wikis.

- **Page Restrictions by Group** will allow administrators to restrict page access based on groups. Currently, page restrictions have to be set on a user-by-user basis.
- Changes to the **Dashboard and Spaces Page** will make spaces easier to find, and the left pane of the dashboard will be sorted so that spaces where you have explicit permissions are displayed first.
- The new **Harvard Community Theme** is designed for public-facing spaces and is optimized for discussions.

If you have any questions, please feel free to reach out to your [local support contact](#).
