Cosmology Journal Club Home

This is the official wiki page of the Dvorkin-Finkbeiner-Kovac Joint Cosmology Journal Club.

We meet every other week, on Tuesdays at 5:30 pm, either at 160 concord avenue (room M-340) or in the Physics building (Lyman 330).

For any questions please contact Cora Dvorkin, Hayden Lee or Benjamin Racine.

Note that the 160 Concord building gets locked at 5:30pm sharp. People working at the CfA should have access with their card, but people from Physics don’t.

If you are not from CfA, please try to come before 5:30.

In the long run, we can add individual names to the allowed list, so please email us a picture of your Harvard ID if you are not working at the CfA.

________

Up Next

For Fall 2019, you can add your name on the list here.
