

Wiki Updates July 2012

In mid-July, the iCommons team made two changes to the Confluence Wiki (<http://wiki.harvard.edu>):

1. The default theme for newly-created Wikis has been set to the Veritas theme. The themes on existing Wikis have not been changed. If you would like to use a different theme for your Wiki, click on the "Browse" drop down, select "Space Admin," and then click "Themes" on the left menu. You will then be able to set your preferred theme.
2. The Wiki will now open in a new tab when accessed from its associated iSite. This change is based on user feedback and is designed to prevent users from losing iSites navigation while browsing a Wiki.

If you have any questions or feedback about these changes, please contact your local support contact.
